LAND & LEDGERS

DOCUMENTATION LIBRARY — PROVISIONAL RELEASE & MAINTENANCE INDEX

STEP 15: CROSS-DOCUMENT LIBRARY PACKAGE

Date: 8 October 2026 | **Library size:** 9 target documents | **Authority status:** Research/development library compiled, core replacements not yet authoritative.

Scope of authorization: User requested autonomous completion of documentation stages without review checkpoints. The document-management workflow can advance; this is not an assertion that the rewritten Bibles passed exhaustive semantic equivalence or that Unity code was tested.

I. Authority hierarchy

1. **Gameplay authority:** Frozen Canonical Project Bible Revision XXXI remains the controlling design source pending manual no-loss release.
2. **Technical planning authority:** Frozen Technical Implementation Bible Revision XIV remains controlling, always subordinate to Canon on intended gameplay; Unity source/repo tests alone establish implemented state.
3. **Specialist historical references:** Evidence, authoring guidance and calibrated observations; never grant new permissions or game rules.
4. **Scenario/reference/test files:** Scenario definitions and fixture requirements; actual authored scenario assets and executable tests must be supplied before claims of completion.
5. **Decision/roadmap files:** Planning only; not source economic/physical simulation truth.
6. **Archived older revisions:** Research and override history only; later revisions govern genuine semantic supersession, but do not erase otherwise valid details.

II. Nine target documents

ID	Workstream	Release state	File
ACTIVE-01	Canon / gameplay authority target	working, not governing	`Land_and_Ledgers_Step_04_Expanded_Consolidated_Canon_Provisional_2026-10-08.md`
ACTIVE-02	Technical / architecture authority target	working, not governing	`Land_and_Ledgers_Step_07_Technical_Enhanced_Provisional_2026-10-08.md`
REF-01	Historical timeline, events and regimes	first edition, verified/provisional labels	`Land_and_Ledgers_Step_08_Historical_Events_Research_Reference_2026-10-08.md`
REF-02	Historical laws, land rights and institutions	first edition, documented statutory holds	`Land_and_Ledgers_Step_09_Historical_Law_Land_Institutions_Reference_2026-10-08.md`
REF-03	Occupation / demography calibration	source-preserved with compatibility cover	`Land_and_Ledgers_Step_10_Refreshed_Calibration_Compatibility_2026-10-08.pdf`
REF-04	Historical work/construction calibration	source-preserved with compatibility cover	`Land_and_Ledgers_Step_11_Refreshed_Calibration_Compatibility_2026-10-08.pdf`
REF-05	Historical economy/price/material evidence	seed evidence ledger, NOT price database	`Land_and_Ledgers_Step_12_Historical_Economy_Calibration_First_Edition_2026-10-08.md`
DEV-01	Scenario/test evidence	documented concepts/fixtures only	`Land_and_Ledgers_Step_13_Scenarios_Playtests_Reference_2026-10-08.md`
DEV-02	Implementation & decisions	tracking register only	`Land_and_Ledgers_Step_14_Imp

			lementation_Decision_Register_2026-10-08.md`

III. Delivery status by roadmap step

Step	Work produced	Gate assessment
01	Baseline 4-source archive/checksums	COMPLETE, originals preserved
02	Rule register + supersession cases	INDEXED, complete semantic dispositions not certified
03	82-clause first consolidated Canon	DRAFT produced
04	Restored-detail Canon with ~101 numbered sections; semantic concordance	DOCUMENT PRODUCED; NO-LOSS GATE OPEN
05	36 Canon-to-technical authority crosswalk requirements	PRODUCED; CODE EVIDENCE OPEN
06	Consolidated Technical architecture draft	DRAFT produced
07	Enhanced Technical + verification audit	DOCUMENT PRODUCED; NO-LOSS GATE OPEN
08	15-entry historical events/regimes catalog	FIRST EDITION; geographic/causal holds flagged
09	16-entry law, rights and institutions register	FIRST EDITION; dated legal holds flagged
10	Occupation report with compatibility front cover	SOURCE 18/18 PAGES PRESERVED
11	Construction report with compatibility front cover	SOURCE 18/18 PAGES PRESERVED
12	Initial economy evidence ledger with 12 observation anchors	FIRST EDITION; not a complete price database
13	Eight scenario families and 16 regression fixtures	COMPILED; executable scenario assets missing
14	All 145 proposals and 10 open blockers	COMPILED; 105 approved/40 pending
15	Library catalog, checksum manifest, consistency checks and ZIP package	PROVISIONAL RELEASE; GOVERNANCE GATES OPEN

IV. Source-to-document route map

Source material	Location and governing treatment
Generic Business/Production/Person and rights	ACTIVE-01 authoritative target; ACTIVE-02 implementation target; frozen original Bibles govern until release
Historical macro-events and local exposure	REF-01; scenario toggle applies only to supported authored event injection
Treaty/federal land, private title and legal powers	REF-02; dated jurisdiction/source controls, not location-independent rules
112 occupations, Census workforce percentages and labor history	REF-03; calibration only, no class permissions or fixed settlement quotas
Dated construction examples and time/rates	REF-04; active vs elapsed/queue/interruption remain distinct
Wages, retail/wholesale prices, materials and freight rates	REF-05, source-qualified seed observations plus explicit missing historical series
Scenario goals and playtests	DEV-01; exact definitions require source scenario files
Design decisions, tests and migrations	DEV-02; implementation claims cannot precede repository evidence

V. Versioning and document-change protocol

7. Make modifications to Markdown or other editable master sources and export PDF snapshots; never write over frozen originals.
8. Use stable IDs for individual rules and historic observations; retain old-to-new ID mapping when adding/removing sections.
9. Each substantive change records reason, author/date, affected Canon/Technical IDs, evidence/source trail, status, regression impact and whether it actually changes gameplay.
10. An historical observation must include date, location, units, grading/scope, source quality and differentiation of claimed versus realized amounts.
11. No descriptive Business, occupation or settlement label can independently authorize an action.
12. Promote provisional Canon/Technical only after source-level semantic verification and resolution of conflicts; documentation approval is distinct from Unity implementation.
13. Retain complete older version artifacts as provenance, while ensuring only one named edition is active at any time.

VI. Release blockers and high-priority next work

- **Critical:** Finish semantic rule-by-rule no-loss comparison against 346-page Canon XXXI and 170-page Technical XIV; fuzzy source index alone cannot prove none were lost.
- **Critical:** Acquire Unity GitHub repository and audit all authority owners and exact data movements; no code access occurred here.
- **Critical:** Re-audit and fix documented `CreateBlockedShipment(...)` duplicate-loaded-cargo hazard before trusting provenance objectives.
- **High:** Obtain full authored scenario files and run fixtures with save/load/time jumps and multi-owner restructuring.
- **High:** Expand dated Dakota-specific law and price datasets with primary sources; keep uncertain anchors marked as holds.
- **Design:** 106–145 remain 40 individually pending proposals, even though some reflect rules already established within XXXI.

VII. Final interpretation

This package satisfies a **provisional documentation assembly** milestone. It does not certify final replacement authority, exact balance calibration, full historical coverage or implemented Unity behavior. The original Bibles remain operative, and open release blockers are included inside the package.
